

MODIFIED SCOTCH FOURSOME

- Each foursome will be comprised of two teams. The two players on the top of the card will be one team and the two players on the bottom of the card the other team. Each team's handicap will be calculated by combining the total of both handicaps and dividing by 2.
- Everybody tees off from each tee. Each twosome then selects the ball they want to play and the player whose ball is NOT selected plays the next shot. The twosome then alternate shots until the ball is holed out. Total score for each hole will be the strokes taken counting only ONE tee shot.
- Total up your 18 hole score and deduct your handicap to get your net score.
- Don't post your scores, but put your scorecards in the box provided.
